

## POWER STEERING FLUID

### PRODUCT DESCRIPTION

PENNZOIL® POWER STEERING FLUID is a premium formulation using high quality lubricating base stocks and select additives. It provides optimum protection in power steering systems of both foreign and domestic automobiles. It controls seal swelling and protects pump parts against wear while providing the proper friction coefficient for proper system operation. The use of fluids not specifically intended for power steering systems may deteriorate the rubber parts in these systems. PENNZOIL® POWER STEERING FLUID is specifically designed to meet the service requirements of all manufacturers. Not all automobile manufacturers recommend power steering fluid, some require transmission or engine oil. It is available in 12 fl. oz. plastic containers.

### APPLICATION

PENNZOIL® POWER STEERING FLUID is ideal for use in the hydraulic power steering systems of American and imported vehicles. It exceeds the severe GM Saginaw power steering fluid specification. U.S. manufacturers now specify specific fluids for use in power steering systems. GM, Ford, Chrysler and AMC each have their own specification. PENNZOIL® POWER STEERING FLUID is recommended for vehicles produced by these manufacturers. Add fluid to power steering reservoir. Do not fill above the specified level. Check fluid levels frequently. Check owner's manual for correct fluid type recommended. Not all automobile manufacturers recommend power steering fluid, some require transmission or engine oil.

### BENEFITS

- Protects power steering system against wear
- Provides controlled seal swelling properties
- Protects rubber hoses
- Resists foaming, oxidation, corrosion and rusting
- Meets U.S. car manufacturers' service requirements
- Stops power steering squeaks
- Mixes with all power steering fluids

Exceeds performance requirements of:

- GM Saginaw power steering fluid
- Ford M2C128D
